23.03.2003.

Figure 6 is a line graph illustrating the relationship between the number of reloads (X-axis) and the probability of detection (Y-axis). The X-axis ranges from 0 to 500, and the Y-axis ranges from 0 to 1.0. Three curves are shown, representing different reload percentages:

- Reload, 100% (Solid Line):** This curve shows the highest probability of detection across all reload counts, starting around 0.95 and ending near 0.8.
- Reload, 75% (Dashed Line):** This curve shows a moderate probability of detection, starting around 0.85 and ending near 0.7.
- Reload, 50% (Dotted Line):** This curve shows the lowest probability of detection, starting around 0.75 and ending near 0.6.

The legend indicates that the solid line corresponds to "Reload, 100%", the dashed line to "Reload, 75%", and the dotted line to "Reload, 50%".
